Technical Skills

Programming Languages: Dart, JavaScript, JAVA

Frameworks: Flutter, ReactJS

Developer Tools: Git, Github, JIRA

Third-Party Integrations: OneSignal, Branch.io, Google Maps

Others: REST APIs, GraphQL APIs, Hasura, OOPs, Clean Architecture, State Management(BLoC Pattern, GETX)

Experience

Mobile App Developer | 02/2025 – Present | Collective Artist Network | Bangalore

BigBang Social — India's First Creator Super-App

- **Leaderboard Feature (Built from Scratch):** Designed and developed a gamified leaderboard system, boosting daily active logins by 20% and increasing creator retention by 30% through rewards, coupons, and participation milestones.
- **Auto DM Feature:** Built a cross-platform automated DM system enabling creators to configure and manage Instagram Auto DMs directly within the app, eliminating platform-switching and reducing DM setup time by 50%.
- **Brand Campaign Feature:** Developed end-to-end brand campaign functionality paying creators based on content views, enabling monetization at scale for 100M+ creators.
- **Dynamic Gauge Scale UI:** Implemented a custom gauge scale component to visually represent campaign performance metrics, providing creators real-time feedback on earnings progress.
- **Backend-Driven Asset Model:** Design a model where all UI assets are served dynamically from the backend, reducing app deployment cycles by 80% and enabling instant UI updates without app store releases.
- **Centralized Deep Link Router Service:** Built a unified deep link routing service that intercepts every incoming URL, parses route paths and query parameters, and navigates users to the correct in-app destination — reducing navigation-related bug reports by 35% and cutting deep link integration time for new features by 60%.

Software Engineer I | 07/2023 – 01/2025 | GeekyAnts | Bangalore

Lala-Maids [LaLa-Maids Pro](#) | [LaLa-Maids](#)

- Developed **Google Maps pin functionality for accurate user address input**, shipped to **production within 2 days**.
- Implemented **OneSignal push notifications** for booking and update alerts; published a public [article](#) on the integration.
- Incorporated **Branch.io integration for seamless referral, booking and payment** sharing, improving user engagement and link-sharing efficiency.
- Built a **complex calendar UI** with dynamic date selection, weekday-based filtering, and slot selection, enhancing the overall scheduling experience.

Software Engineer Trainee | 05/2022 – 06/2023 | GeekyAnts | Bangalore

[Arxara](#)

- Implemented a replica of **Instagram's story upload and delete functionality**, increasing user-generated content.
- Created a **content feed supporting both photos and videos**, boosting active user participation across the platform.
- Developed an **infinite image scroll feature**, contributing to a **25% increase in session duration**.

Education

Chitkara University

Bachelor of Technology in Computer Science (CGPA: 9.81)

Rajpura, Punjab
