Technical Skills

Programming Languages: Dart, JavaScript, Java

Frameworks: Flutter, React

Web: HTML, CSS, Vite, Tailwind CSS, Radix UI/Shadcn

Developer Tools: Git, GitHub, JIRA

Integrations: Firebase, OneSignal, Branch.io, Google Maps, CleverTap

Local Storage: Shared Preferences, Hive

Concepts: REST APIs, GraphQL APIs, Hasura, OOP, Clean Architecture, State Management (BLoC, GetX)

Experience

Galleri5 (Collective Artists Network)

Feb 2025 – Present

Senior Software Engineer

Bangalore

- Developed **Galleri5 AI Studio**, a **generative AI platform** for filmmakers and brands, building its **visual workflow canvas**, **AI chat assistant**, and **model workspace** with **React**, **Vite**, **Tailwind CSS**, **Radix UI**, and **Firebase**.
- Integrated **200+ AI video/image models** (Seedance, Kling, Wan) into a unified **Model Garden** with one credits wallet, replacing API polling with **real-time job listeners** for live generation status.
- **Built a leaderboard feature from scratch** for **BigBang Social** (**Android** | **iOS**), a **Flutter** creator app with **500K+ downloads**, increasing daily active logins by 20% and creator retention by 30% through rewards, coupons, and milestones.
- **Developed an Auto DM feature** that enabled creators to manage Instagram automated messages within the app and reduced setup time by nearly 50%.
- **Shipped a brand campaign module** that enabled content-view-based payouts and supported scalable creator monetization for a 100M+ creator ecosystem.
- **Implemented a dynamic gauge-scale UI** to visualize campaign performance and help creators track earnings progress in real time.
- **Designed a backend-driven asset model** for dynamic UI delivery, reducing deployment cycles by 80% and enabling updates without app store releases.
- **Created a centralized deep-link router service** that reduced navigation-related bug reports by 35% and cut integration time for new features by 60%.

GeekyAnts

May 2022 – Jan 2025

Software Engineer II

Bangalore

Lala-Maids (**Android** | **iOS**) – Lala-Maids Pro (**Android** | **iOS**)

- Developed **Google Maps pin-based address selection** for precise location input and shipped it to production **within 2 days**.
- Integrated **OneSignal push notifications** for booking and status updates and **Branch.io deep links** for referral, booking, and payment sharing; published a public **technical article** on the notification setup.
- Built a **complex scheduling calendar UI** with dynamic date selection, weekday filtering, and **time-slot booking** for a smoother booking experience.

Tata MD (**Android** | **iOS**)

- Built an end-to-end **doctor appointment booking flow** for a **10K+ download** healthcare app, with doctor and specialty search, real-time availability, and online and in-clinic consultations.
- Implemented **API-driven slot scheduling** with a **15-day availability window**, handling booking, cancellation, and tracking across 3 appointment states (upcoming, completed, canceled).
- Delivered lab and procedure booking for **10+ diagnostic services** (X-ray, ultrasound, blood tests) and an **in-app support ticketing system** for faster issue resolution.

Education

Chitkara University

Rajpura, Punjab

Bachelor of Technology in Computer Science (CGPA: 9.81)
